

ENDURO HYBRID PLUS CARTONS CONVENTIONAL & UV CURING INKS

Cartons

Dedicated blanket designed to meet the demands of the packaging industry

Specially designed nitrile rubber used in surface layer gives sharp half tones and high quality solids

Smooth micro ground surface gives excellent sheet release characteristics

Thick micro sphere compressible layer allows major smash absorption

Special surface layer greatly minimises swelling caused by uv curing inks making this a very versatile blanket when switching from UV to conventionally printed projects

ADVANCED

ENDURO HYBRID PLUS

TECHNICAL INFORMATION

Construction

Three-ply compressible

Surface

Micro ground

Smoothness

0.7µm

Compressibility

7.2% @ 100 N/cm²

Micro hardness

67°

Elongation

1.3% stretch@20N/mm

Shore hardness

80°

Tensile strength

>60 N/mm

Nominal thickness

1.68mm, product 0477

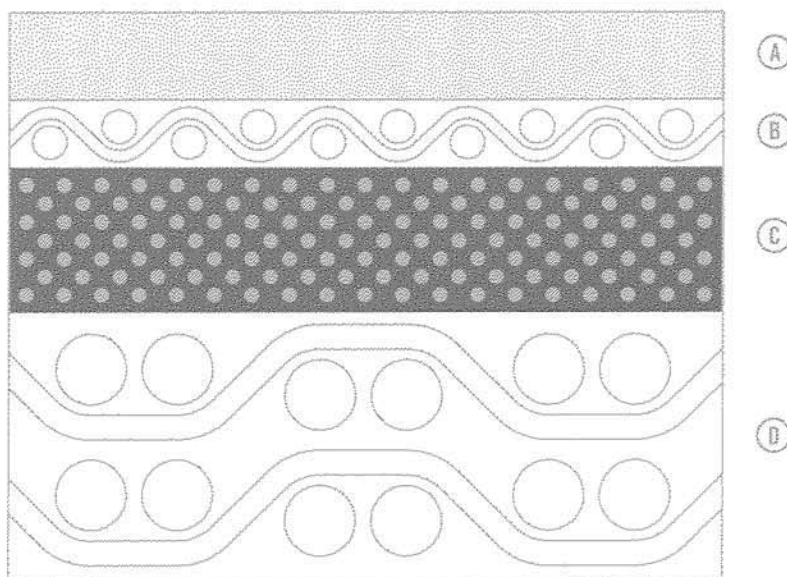

1.95mm, product 0478

Standard roll widths

1550, 1850, 2100, 2300mm

Colour

Grey

A. Micro ground surface layer
high quality sharp dot
reproduction, excellent half
tones and solids

B. Stabilising fabric
high quality and durable,
provides extra robustness

**C. Thick micro sphere
compressible layer**
good smash resistance,
durability

D. Dense low stretch fabric
Provides extra stability to
the blanket
